Todd Fenton, 48

~ 2/22/1965 - 10/02/2013 ~

Carrollton Farmers Branch Independent School District in Dallas, Texas

By: Jill Fenton, Daughter

October 2, 2013 my daddy was brutally murdered in his office at work by a fellow co-worker. He was shot 10 times, in the back of the head, neck, and each side of his back. Seven out of 10 were considered "kill shots". The suspect is caught on camera so there is no doubt who did it. The crime according to the surveillance cameras shows the crime happening at 3:02pm however, my daddy's lifeless body was not found until 11:20pm. For eight hours my daddy laid in a puddle of his own blood. As sad as that story sounds the "where" is very concerning. My daddy worked for a school district he was in charge of managing the groundskeepers. His office was off

of the "bus barn" which is located on the same property as the district's building. The suspect had no business being at that location. My Daddy's life was taken not too far from a sign that says, Gun free zone and it's a felony to have one on the property. The suspect had showed his gun off three years prior after receiving his CHL to everyone. Nothing was done about that. A man far down the road heard six fast gun shots and four slow. How many questions have you asked yourself from my story? Then think about the questions the family have.....why, how, where was the security, and that's just the beginning of the questions I have.

The suspect has yet to be found and justice hasn't been served either.

How do you think this affected my family? Our lives have been turned upside, filled with questions and no answers. My mom can't leave the house, she had poor health to begin with and it's only gotten worse, I have a bad back and have been rendered disabled this hasn't helped that any. The list goes on and on. I want it to be known that workplace

violence does exist and it is a problem.....huge problem. Nowhere is safe

and that needs to be changed. My daddy worked two jobs and even I thought if anything were to happen it wouldn't be at a school district, I was in complete shock and how the school district has handled this as if it never happened and want to forget about it. More questions. I hope this brings awareness to workplace violence and shows that this a real issue and a deadly one at that.

This isn't an OSHA jurisdiction so no investigation there but it is ongoing case and we have been going at this for two years and some days it seems like a dead end street. My daddy meant something to me,

my family, and numerous others we deserve justice. He may have been a nobody to some even a company he worked for 15 years but he was son, husband, daddy, grandfather, uncle, son- in-law, friend, hard worker and so much more.
